007e® ECM High-Efficiency Circulator

Taco 007e® is a variable speed, high-efficiency wet rotor circulator with an ECM permanent magnet motor. The 007e is everything you love about the 007. It is ideal for hydronic systems zoned with circulators or zone valves. The 007e delivers the performance equivalent of the 007 plus the reliability and easy installation that made the 00® famous. **Install it, forget it.™**

- ECM performance equivalent to the legendary 007 circulator
- High-efficiency ECM motor uses up to 85% less electricity
- Ideal for hydronic systems zoned with circulators or zone valves
- **BIO Barrier®** protects pump from system contaminants
- **SureStart®** automatically frees locked rotor condition and self-purges air from pump
- **Green Mode** active system monitoring and automatic power optimization
- Integral Flow Check (IFC®) included
The 007e® is ideal for hydronic baseboard systems.

- Dual electrical knockouts, 6” stranded wire leads included for easy wiring
- Use with a Taco ZVC Zone Valve Control or SR Switching Relay for ON/OFF operation
- 10’ Shut-off head, 16 gpm max flow
- Optional 2-way flange model reduces SKU’s and provides universal fit-up to any flange position
- Double insulated — No ground wire required
- Whisper quiet operation

Orange LED: Indicates 007e is running normally

SureStart® LED: Indicates the innovative SureStart® automatic unblocking and air purge is active

Green Mode LED: Indicates the 007e is running in Green Mode for power optimization

Typical Applications

For zoning with circulators

Across a series loop system using zone valves
The 007e performance is ideal for hydronic zoning to reduce velocity noise or banging of zone valves closing against high head pressure circulators.

The 007e has an additional Green Mode operating curve that will self-adjust automatically.

**Green Mode:** After 7 days of constant running, the 007e will adjust its curve to Low Proportional Pressure curve for power optimization. (See Green Mode curve above) LED will change to green. The 007e will reset to the original normal mode curve every time it cycles OFF.
Specifications

- Max. Shut-off Head: 10 feet
- Max. Flow: 16 gpm
- Max. Operating Pressure: 125 psi (8.6 bar)
- Max. Water Temp: 230°F (110°C)
- Min. Water Temp: 36°F (2°C)
- Electrical specifications:
  - Voltage: 120V, 60 Hz
  - Single phase
  - Max. Operating Power: 44W
  - Max. AMP Rating: 0.54
- Equipped with a cast iron casing and should be used for closed loop systems only
- Not suitable for chilled water or open loop potable water systems
- Taco circulator pumps are for indoor use only
- Acceptable for use with water or maximum of 50% water/glycol solution

Materials of Construction:

Casing: Cast Iron
Stator Housing: Composite
Cartridge: Composite
Impeller: Composite
Shaft: Ceramic
Bearings: Carbon
Thrust Bearing: Ceramic
O-Ring & Gaskets: EPDM

Applications

The 007e is a variable speed, high-efficiency wet rotor circulator with an ECM permanent magnet motor. Its ECM performance is equivalent to the legendary 007 circulator and is ideal for hydronic systems zoned with circulators or zone valves. The 007e is not suitable for chilled water or open loop potable water systems.
